

# A Step in Time

How can we make tints of primary colours  
to create a painting in the style of William Morris?

## 1. Who is William Morris?

William Morris was born in 1834. He was an **artist** who made lots of his art in a studio in **Merton Abbey Mills**. He is very famous and people still love his work

## 2. What are the primary colours?

The three primary colours are basic colours that can be mixed together to produce other colours. They are **red, yellow, blue**.

## 3. How can I create tints of primary colours?

Tints are lighter colours that are made by **mixing a colour with white**. For example, pink is a tint of red, and light blue is a tint of blue.

## 4. How can I create a William Morris picture?

We will create our own pictures in the style of William Morris. We will be adding white paint to primary colours to create tints.
