

A Step in Time

What is a human?

1) What is a human?

A human is a type of species. You can identify humans by their body parts. The main ones we will be looking at are:

head, neck, arms, elbows, legs, knees, face, ears, eyes, hair, mouth and teeth.

Humans have 5 different senses. They are hearing, smell, taste, touch, and vision. They help us to understand and observe the world around us.

4) How does the human body use its touch sense?

Our sense of touch is what we use to feel. Unlike the other senses, the sense of touch is found all over the body. Objects can feel hot, cold, rough or soft, prickly, bumpy, smooth etc.

5) How does the human body use its smell sense?

Our sense of smell is what we use to smell things. The body part we use to smell is our nose. Things may smell sweet, tasty, or stinky etc.

6) How does the human body use its taste sense?

Our sense of taste is what we use to taste food. The body parts we use to taste is our mouth and tongue. Food can taste salty, sour, sweet or spicy etc.

2) How does the human body use its sight sense?

Our sense of sight is what we use to see. The body part which we use to see is our eyes. Objects may look colourful, shiny, pretty or scary etc.

3) How does the human body use its hearing sense?

Our hearing sense is what we use to hear. The body part which we use to hear is our ears. Noises may sound loud, quiet, or musical etc.

If we are worried about our bodies we can see a doctor. The first female doctor in the UK was called Elizabeth Garrett Anderson.
