

Can I compose my own triumphant tune?

1. Can I identify the repeating tune?

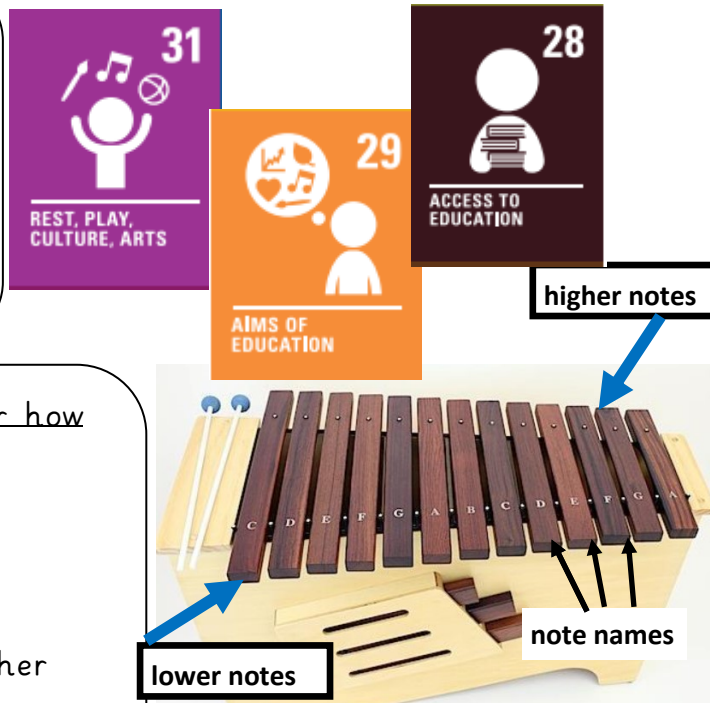

Identify the repeating melodies in a tune/melody is composed.

(Different notes/pitches put together in a sequence).

2. I can identify the pitch (how high or how low a sound is.)

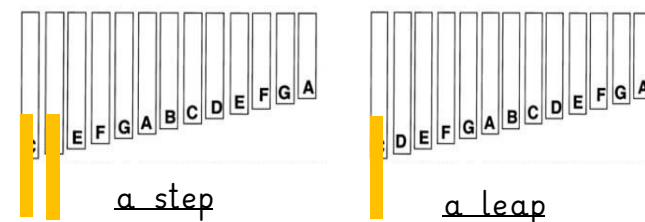

Longer / bigger instruments make lower sounds.

Shorter / smaller instruments make higher sounds.

3. You can make a **melody** (a **tune**) by putting different pitches in a sequence.

Melodies can move by leaps (big jumps between pitches) or by step (pitches that are next to each other).

Instruments and how to play them

glockenspiel (metal)

xylophone (wooden)

Both are played by striking with a loosely held beater.

Featured music

Over the Rainbow

By Harold Arlen

Composed for the 1939 film *The Wizard of Oz*

Key words

pitch—how high or low a sound is

dynamics—how loud or soft (quiet) the music is

notes—different pitches in music.

Named with letters from A–G

melody (tune)—a sequence of pitches / notes.
